Components

Concept

Safety

Environment

Smart Trailer

The innovation was developed by: (Please tick)

in-house development department

supplier/manufacturer

external consultant

Patent applied for: (Please tick)

yes, patent no. _____

Nein

Why does the innovation deserve the „International Trailer Award“?

(Please describe the innovation of your product.)

What problems does the product solve? What is the most important benefit for the user?

[Empty text area for describing product problems and benefits]

Please briefly describe the instructions for using your product.

[Empty text area for describing product instructions]

Please add photos and/or drawings as image files (jpg, tif, eps in 300 dpi resolution) showing the innovative character.

Number of images _____

If the documents are incomplete or the deadline has not been met, the product cannot take part in the competition. The jury must receive the application by 28 June 2024.

You can only register your product with this fully completed entry form and I agree that the entry may be published in advance at www.international-trailer-award.com after 28 June 2024.

Yes, I agree

No, I do NOT agree

All articles will be published in the August issue of Truck & Trailer Welt and, depending on the editorial concept, in the partner magazines. The online publication is intended to make the innovations accessible to a wider audience in advance. If the innovation is not to be published in advance, the jury will honour this request without reservation.

Date _____

Signature/company stamp _____

Conditions of participation

Nomination

The most important criterion for the nomination is that the innovation contributes to greater efficiency in road freight transport. The transport company must achieve clear advantages for its daily work, for example: more safety, faster handling, less weight - and yet the product must bring economic advantages in the face of tough competition. The product must have significant technical improvements. Small improvements to details or facelifts are not enough.

Type of innovation

Innovations of all types and sizes (component, material, detailed solution, system solution, overall concept) from the trailer sector can be submitted until 28 June 2024. The submitted object must relate to the trailer, semi-trailer or body (not the motor vehicle). Prototypes and production-ready solutions that have been in series production for no longer than two years are eligible (deadline: 28 June 2024).

Conditions for award winners

If the participant is one of the winners, they must promise to present their object at the IAA Commercial Vehicles 2024 (if they do not have their own stand, at least on the day of the award ceremony as part of the event). A short film presentation of the object is desired for the award ceremony. Participation in the „Trailer Innovation“ competition is not associated with participation fees or other costs.

Legal matters

There is no legal entitlement to an award. By participating, the participant accepts all rules and decisions of the jury.

Deadline

Applications possible until 28 June 2024
